RTM Technology

Resin Transfer Molding

RTM – (Resin Transfer Molding) is a method for manufacturing waterslides in closed molds, which consists in forcing catalyzed resin to a tightly closed mold.

This method provides shinny surface for both inner and outer side of a slide, visually appealing to the spectators.

Benefits of RTM is not limited with visual aspects, the more durable and lighter in weight waterslides enable easy to assemble and maintain.

Polgün is one of the rare companies in the world who use RTM in waterslide manufacturing.

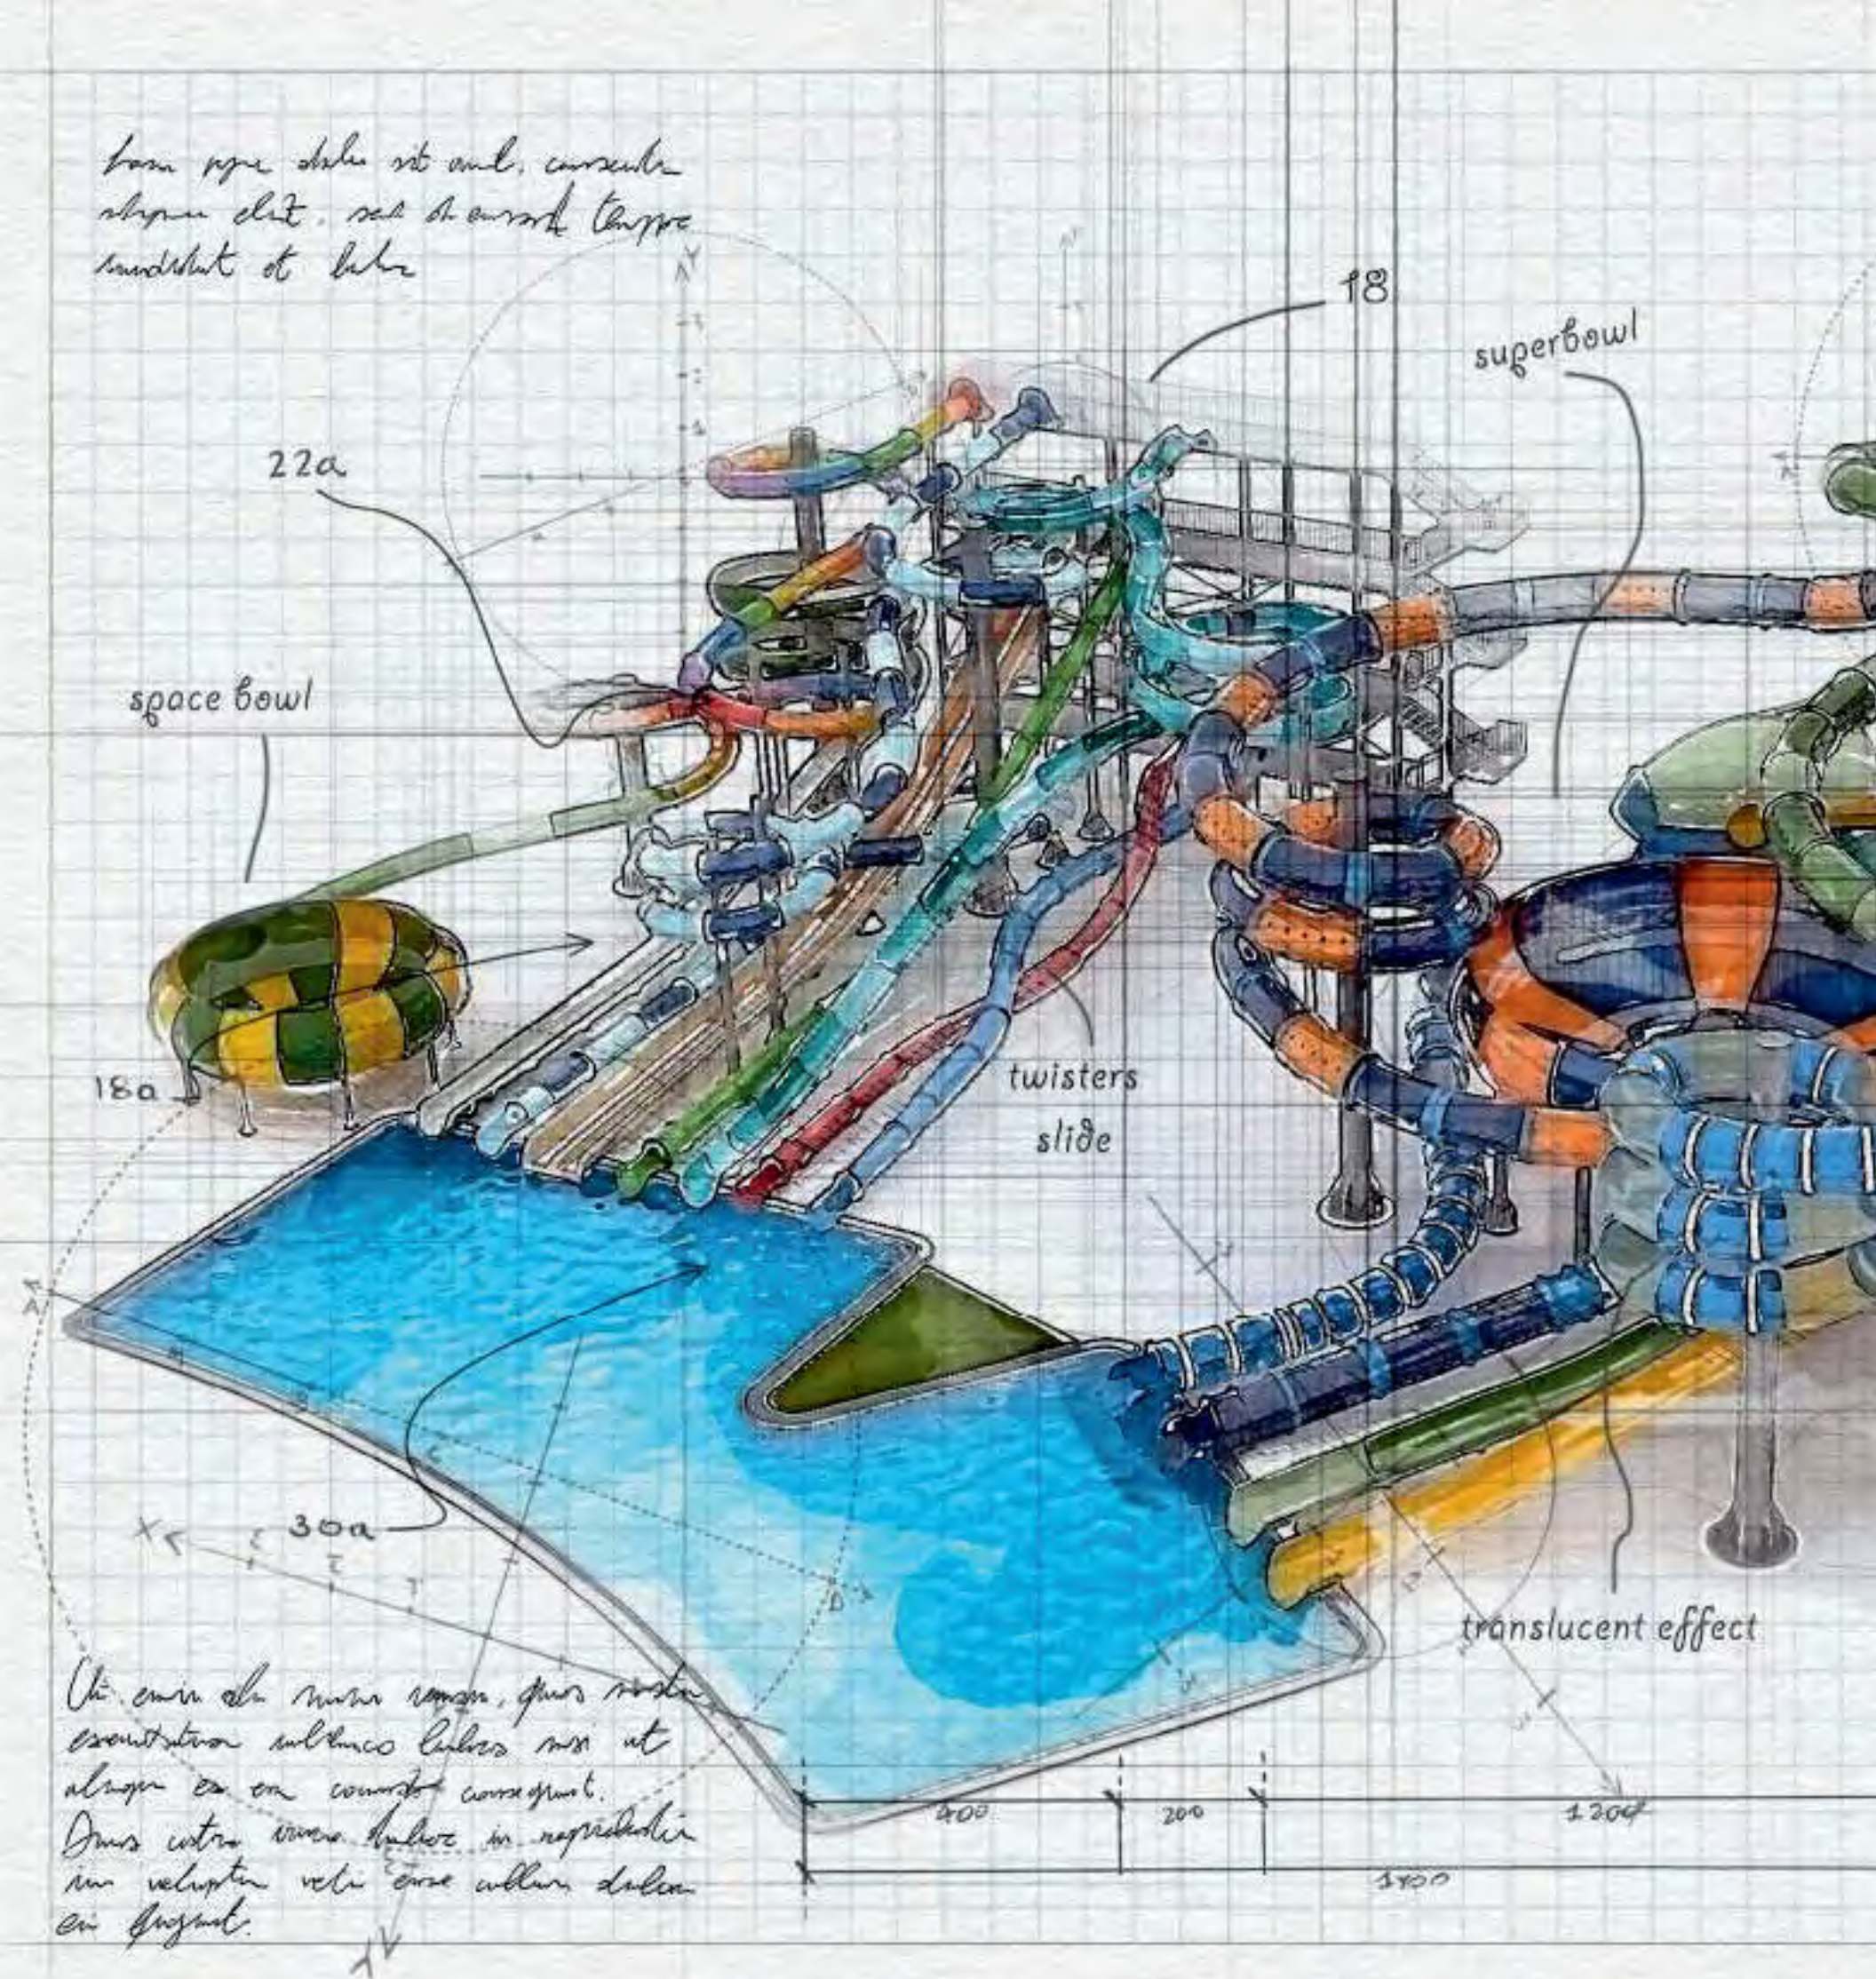

KEY FEATURES

- High quality and uniform/repeatable structure
- Low emission of volatile compounds to the air
- Highest resistance of the product in comparison with other methods
- Aesthetic and smooth surface from both sides
- Low waste and low consumption of materials

Design for Better

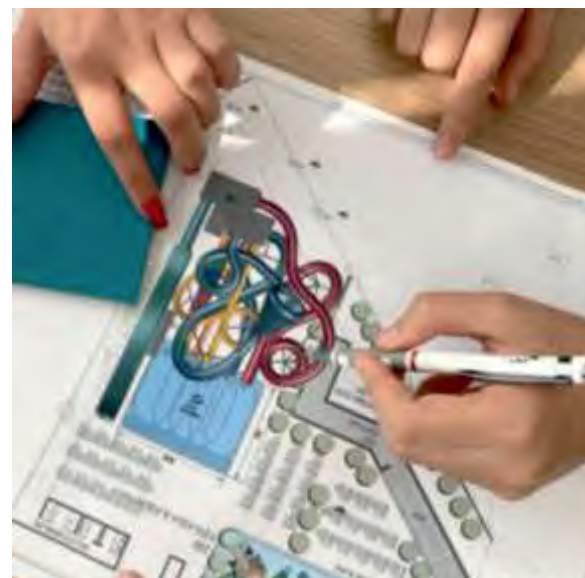

Our team of designers, developers and 3D artists are seeking for growth, influence and agility to design and build the next generation of products, experiences and services. This enables the design department to produce a large volume of diverse high-quality projects. At **SIBA** we want to offer desirable designs to customers around the world. For many years, as we grew our business and entered new markets, we deliver our vision of creating a better ride experience for your guests. Our designers are here to ensure and develop strong a design identity in our product range as we continue to meet the needs and dreams of our clients.

Engineering

SIBA's in-house team of engineers and architects form the core of the various stages of the projects that conduct the functions from designing the whole structure to determining all sorts of environmental conditions. Experience and vision are the keywords for us, the engineering process take the project from a vision to a massive reality while ensuring the safety and visual facts. A project itself is highly driven by designers and engineers in the means of environmental conditions where the project will be installed, the calculations for an exact curvature of a water slide and the analyses of the safety aspects.

SIBA

Planning

'Planning is a core value for our company since the success behind all projects rely on well-managed project planning. **SIBA** Project Planning division is responsible of the whole project phase encompassing all the tasks between project initiation to detailed design. It is at this crucial stage where risks associated with the project are analyzed and the specific project execution approach is defined. The value of your investment is our priority in our planning process; therewithal the success follows in every stage of your project.'

SIBA

Assembly

Our products reaching the project site are subjected to the final checks before the assembly by the relevant team and the products are installed according to the assembly manual prepared by the engineering department for each project. Our turn-key process would be completed by our assembly and application team only after performing tests, the correct usage training and hanging of the necessary warning signs. To provide safety is one of our major principles, we apply to our professional assembly team, working in our company for many years and has been carrying out installation and application duties by going to various countries where we carry out our projects.

After Sales

Our primary purpose is to meet the demands of our clients about after sale training, spare parts procurement, technical service and to keep the customer satisfaction on the top level. We provide periodic and annual maintenance, part replacement and refurbishment with our expert team to all kinds of water parks, water slides, pool systems, as well as slide renewal operation. Based on 100% customer satisfaction principle our aim is to put emphasis on reliability, privacy and honesty principles also in all relations with our unique after sales service. A corporate culture based on productivity and continuous improvement, we are always one step ahead with providing high quality, quick, flexible and solution oriented after sales service to our worldwide clients and dealers.

LIGHT EFFECTS

How many colors can you see when sliding from a slide? A wonderful visual fest where you can see all colors with Light Effects is waiting for you. With the light effects, which can be applied to any number of tubes, mostly on aqua tube and black hole, riders will travel to a different world with the magnificent visuality of colors while experiencing the adrenaline. With our special RGB led effect, we add color to waterparks both indoor and outdoor.

The Value of Happiness

Creating unforgettable memories, together

Happiness is our main objective in the attraction industry. We want to keep everyone that works at **SIBA** happy every day, because we know that all that happiness will be transmitted to everyone related to our company: dealers, clients and guests. We pass down a happy and positive spirit to inspire our people to get creative and offer new and better solutions for our clients every day.
